

North Boundary Run

By Todd Schneider - OMNNI Associates, Inc.

Volume 2

Special points of interest:

- Work on water hardware this week.
- WE Energies work on gas services continues on Seneca
- Whitney Dr. to see most of construction this week.
- Mark all sump pump and downspout locations to the ditch.

Working to keep erosion control measures in place during construction.

Week of April 19 –23

This week was similar to work that happened last week. Contractor is busy replacing water service curb boxes. These boxes are placed over the valve that allows water to be shut off outside your home. All curb stop boxes have been replaced on Whitney and a few are done on Roselawn. The contractor will move to replacing the bolts for fire hydrants, at Roselawn/ Whitney and Seneca/Whitney. Once all the work on water main and water services is complete on Whitney, the contractor may start installing storm sewer on Whitney. Or they will start on Hiawatha fire hydrants. The contractor would like to stay ahead of the gas company and therefore will jump up to Hiawatha. This work may

New water service curb box. Each property will receive one.

require the Town to shut off water. You should receive a note on your door 1 day in advance of water being shut off. Gas main work will be completed on Roselawn this week. They are scheduled to move to Seneca next week.

Orange lines have been painted in all concrete driveways. This is the location that your driveway will be removed to. They will be saw cut

at the orange marking so they can be removed later on.

To recap, Whitney will still be the location of most construction activities this week, with Hiawatha seeing some as well later in the week. Please plan accordingly if you receive a notice that water may be shut off. It takes several hours for the contractor to do their work before water can be turned on again.

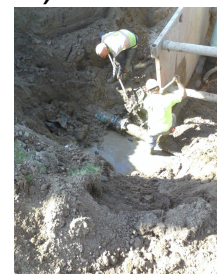

The Crew is doing their best to keep the site clean. The contractor has been asked to haul away some of the piles of asphalt and concrete that have been building up on Whitney.

A Look Ahead at Next Week (April 26 - 30)

The Week of April 26 will be more water main and service work. What street they will be on is a little up in the air. If gas main work begins on Seneca, then water work will likely continue on Roselawn and possibly Hiawatha. There is the potential that another crew will be arriving onsite, but as of now, we have not been notified of that. If that does happen, there

will be work happening in multiple locations. We'll try to keep you as up to date as we can with the schedule.

As always, if you have any questions or concerns, please contact the OMNNI Inspector at 585-9246.

Work at Roselawn & Hiawatha water valves.
